

READY MIX CONCRETE (RMC)
Manufacturer and Supplier

ABOUT US

Welcome to Artius Concrete! We are a Ready Mix Concrete Manufacturer & Supplier company based in Mumbai. As a preferred partner, we provide concrete solutions to developers, contractors, builders, architects, government agencies, and individual home builders at large. With a proven track record of reliability and prompt delivery, count on us for all your construction needs.

Our Mission

At Artius concrete our mission is to provide innovative and superior quality products to our customers at affordable rates

Our Vision

To attain leadership position in the industry by providing quality concrete solutions on time, creating customer delight.

At Artius Concrete, we firmly believe in fostering long-lasting relationships with our clients. We aim to provide best quality of Ready Mix Concrete and other construction materials.

WHY CHOOSE US

- 👉 The raw materials used in the manufacturing are all well tested on the timely basis by an industry standard.
- 👉 We ensure a homogenous mixing of the material by our high efficiency mixers like pan-type twin shafts mixers.
- 👉 We do not compromise with the quality needed to be delivered to our client and work around the clock in accordance with it.
- 👉 We maintain a fully equipped laboratory with an efficient team of engineers at each plant.

Ready Mix Concrete (RMC) Solutions

Our RMC Plant

At Artius Concrete, we operate a state-of-the-art batching plant with a capacity of 1.25 MT, equipped to meet the diverse needs of our clients in both residential and commercial sectors. Our commitment to quality, reliability, and customer satisfaction drives us to produce the finest Ready Mix Concrete solutions for a variety of applications.

Wide Range of Ready Mix Concrete

We offer a comprehensive range of concrete mixes, tailored to meet different project requirements:

- ✔ M-10, M-15, M-20, M-25, M-30, M-35, M-40, M-45, M-50, M-55, M-60 (with Fly Ash)
- ✔ M-10, M-15, M-20, M-25, M-30, M-35, M-40, M-45, M-50, M-55, M-60 (with GGBS)
- ✔ M-10, M-15, M-20, M-25, M-30, M-35, M-40, M-45, M-50, M-55, M-60 (Pure OPC)
- ✔ M-20, M-25, M-30, M-35, M-40, M-45, M-50, M-55, M-60 (Free Flow/Mivan)
- ✔ M-20, M-25, M-30, M-35, M-40, M-45, M-50, M-55, M-60 (Self Compacting)

PRODUCTS

Quality Assurance

- 1. Concrete Mix Designs:** Created using the DOE Method, conforming to IS 456:2000 & IS 10262 - 2019, ensuring optimal concrete strength and durability.
- 2. Exclusive Cement Sourcing:** We exclusively use OPC 53 Grade Cement for guaranteeing optimal strength and durability.
- 3. Aggregates Sourcing and Production:** Aggregates are sourced and produced according to IS 383:1970, ensuring high-quality materials at our state-of-the-art VSI Plant.
- 4. In-House Quality Control:** We maintain a well-equipped and well-operated lab, ensuring that all materials and mixes undergo rigorous testing and quality checks.
- 5. Concrete Mix Design Expertise:** Artius Concrete prides itself on providing advanced, high-performance concrete mix designs. Our in-house consultant, with extensive technical knowledge and expertise, ensures that every mix is optimized for performance, durability, and cost-effectiveness.
- 6. Customized Concrete Solutions:** We specialize in producing custom concrete mixes for various applications, from high-strength formulations to eco-friendly mixes incorporating Fly Ash and GGBS. Whether your project requires specialized concrete for foundations, roads, or decorative structures, our team provides the most reliable and sustainable solutions.

Ice Concreting Services: Our state-of-the-art facilities and experienced team enable us to provide high-quality Ice Concreting services. This specialized technique is used in projects where a rapid set is required, such as:

- **Ice Road Construction:** We help create temporary roads in remote areas by using a mixture of water and cement to produce a quick-setting concrete that supports heavy loads.
- **Emergency Situations:** Ice concreting is often used for emergency repairs and maintenance, allowing projects to be completed efficiently and effectively.

- **Unique Structures:** This technique is also used for the construction of unique structures such as bridges, dams, and other critical infrastructure projects where time is of the essence

At Artius Concrete, our commitment to quality and excellence ensures that you receive high-performance concreting solutions that meet your unique project requirements, whether it's standard or specialized applications like ice concreting.

Commitment to Excellence

By combining industry best practices with cutting-edge technology and an in-depth understanding of concrete chemistry, we deliver concrete that performs exceptionally under a wide range of conditions. Our solutions are trusted by clients across industries for their reliability, cost-efficiency, and durability.
